ELSEVIER

Nuclear Instruments and Methods in Physics Research B 139 (1998) xiii-xvii

NIM B
Beam Interactions with Materials & Atoms

Contents

Editorial vii

Conference photographs viii

Committees and Sponsors xii

I. Invited papers

Trends in electron accelerator applications
S.P. Kapitza and Y.M. Tsipenyuk 1

Nanodevices produced with focussed ion beams
U. Dötsch and A.D. Wieck 12

Electron and ion emission properties of iridium supertip field emitters
A. Knoblauch, T. Miller, C. Klatt and S. Kalbitzer 20

Fission fragment accelerators for the Grenoble and Munich high flux reactors
O. Kester, D. Habs, T. Sieber, M. Gross, A. Kolbe, U. Köster, A. Schempp and U. Ratzinger 28

Plasma-immersion ion implantation
R.W. Thomae 37

Low-energy electron accelerators in industry and applied research
W. Mondelaers 43

Ion beam analysis of diffusion in heterogeneous materials
A.S. Clough and P.M. Jenneson 51

High energy ions for materials analysis, materials modification and medical applications
H. Homeyer 58

Operation and development of the new spallation neutron source SINQ at the Paul Scherrer Institut
G.S. Bauer 65

IFMIF – An international fusion materials irradiation facility
K. Ehrlich and A. Möslang 72

The European spallation source study
H. Lengeler 82

Nuclear, physical and chemical aspects in cyclotron production of radionuclides
J.J.M. de Goeij 91

Low energy boron implantation in silicon and room temperature diffusion
E.J.H. Collart, K. Weemers, N.E.B. Cowern, J. Politiek, P.H.L. Bancken, J.G.M. van Berkum and D.J. Gravesteijn 98

Ion implantation and mass transport in $YBa_2Cu_3O_{7-\delta}$ films and substrates
J.A. Kilner and Y. Li 108

High-energy heavy ion beams in materials science
J.A. Davies, J.S. Forster and S.R. Walker 120

The REX-ISOLDE project
D. Habs, O. Kester, T. Sieber, A. Kolbe, J. Ott, G. Bollen, F. Ames, D. Schwalm, R. von Hahn, R. Repnow, H. Podlech, A. Schempp, U. Ratzinger, L. Liljeby, K.-G. Rensfelt, F. Wenander, B. Jonsson, G. Nyman, P. Van Duppen, M. Huyse, A. Richter, G. Shrieder, G. Walter and REX-ISOLDE collaboration. 128

0168-583X/98/$19.00 © 1998 Elsevier Science B.V. All rights reserved

Plasma ion sources CVD plasma aspects, limits and possibilities
D.C. Schram 136
Ion sources for accelerators
P. Spädtke, J. Bossler, H. Emig, K.D. Leible, C. Mühle, H. Schulte and K. Tinschert 145
A new generation of small facilities for accelerator mass spectrometry
M. Suter 150

II. Analysis techniques and detection technology

On-line elemental mapping in biomedical research
P.J.M. Brands, P.H.A. Mutsaers and M.J.A. de Voigt 158
Applications of external beam PIXE at RMIT
M. Moser, I.F. Bubb, P.N. Johnston, M. El Bouanani, W.B. Stannard and R.C. Short 164
Co(III)EDTA as extra-cellular marker in μPIXE-analysis of rat cardiomyocytes
J.A. Quaedackers, R.M.G.J. Queens, P.H.A. Mutsaers, J.J.M. de Goeij, M.J.A. de Voigt and G.J. van der Vusse 169
Elemental composition of sediments determined by TTPIXE
J.E. Martín, R. García-Tenorio, M.A. Respaldiza, F.J. Ager and M.F. da Silva 175
Micro-PIXE and FT–IR microscopic studies of mineralized nodules formed in rat bone marrow stromal cell cultures
E. Rokita, P.H.A. Mutsaers, J.A. Quaedackers, G. Tatoń and M.J.A. de Voigt 180
Optimisation of Pt sensitivity in PIXE analysis of thin biological samples
T.B. Tiourina, P.H.A. Mutsaers and M.J.A. de Voigt 186
Analysis of glassy spherules extracted from Carpathian Mesozoic lime stone by μPIXE method
I. Uzonyi, Á.Z. Kiss, P. Solt, L. Dosztály, O. Kákay Szabó and C.H. Detre 192
Use of a variable incidence angle PIXE arrangement for studying pigment multilayers
G. Weber, J.M. Delbrouck, D. Strivay, F. Kerff and L. Martinot 196
Proton non-Rutherford backscattering study of oxidation kinetics in Cu and Fe sulphides
M. Chiari, L. Giuntini, G. Pratesi and A.P. Santo 202
RBS measurement of depth profiles of erbium incorporated into lithium niobate for optical amplifier applications
V. Peřina, J. Vacík, V. Hnatovicz, J. Červená, P. Kolářová, J. Špirková-Hradilová and J. Schröfel 208
In situ, real-time RBS measurement of solid state reaction in thin films
C.C. Theron, J.A. Mars, C.L. Churms, J. Farmer and R. Pretorius 213
The new time-of-flight ERDA setup at the HMI-Berlin
W. Bohne, J. Röhrich and G. Röschert 219
TOF-ERDA spectrometry applied for the analysis of Be migration in (100) GaAs
T. Sajavaara, J. Jokinen, K. Arstila and J. Keinonen 225
Study of corrosion layers using backscattering ions
H.-E. Zschau, H. Baumann, K. Bethge, F. Link and G. Wachsmuth 230
RBS/simulated annealing analysis of silicide formation in Fe/Si systems
N.P. Barradas, C. Jeynes, K.P. Homewood, B.J. Sealy and M. Milosavljevic 235
High depth resolution Rutherford backscattering analysis of Si–$Si_{0.78}Ge_{0.22}$/(0 0 1)Si superlattices
N.P. Barradas, C. Jeynes, O.A. Mironov, P.J. Phillips and E.H.C. Parker 239
Residual post anneal damage of Ge and C co-implantation of Si determined by quantitative RBS-channelling
A. Nejim, N.P. Barradas, C. Jeynes, F. Cristiano, E. Wendler, K. Gärtner and B.J. Sealy 244
^{12}C-RBS investigation of scolecite crystals interacted with Cs- and Sr-aqueous solutions
P. Misaelides, A. Godelitsas, F. Noli and S. Kossionidis 249
Investigation of ⟨100⟩ silicon samples on cyclotron beams with channeling method
F. Ditrói, J.D. Meyer, R.W. Michelmann and K. Bethge 253
PIXE measurements of particulate concentrations in atmosphere near a steel smelter in Genova (Italy)
P. Prati, F. Lucarelli, P.A. Mandò, S. Tonus, A. Zucchiatti and F. Calastrini 258

Prompt nuclear analytical techniques for material research in accelerator driven transmutation technologies: Prospects and quantitative analyses
J. Vacík, V. Hnatowicz, J. Červená, V. Perina, R. Mach and I. Peka 264
C and N depth profiles of SiCN layers determined with nuclear reaction analyses and AES
F. Link, H. Baumann, K. Bethge, H. Klewe-Nebenius and M. Bruns 268
Exploration of X-ray and charged-particle spectroscopy with CCDs and PSDs
D.P.L. Simons, P.H.A. Mutsaers, L.J. van IJzendoorn and M.J.A. de Voigt 273
Factors affecting image formation in accelerator-based fast neutron radiography
R.M. Ambrosi and J.I.W. Watterson 279
A Monte Carlo study of the effect of neutron scattering in a fast neutron radiography facility
R.M. Ambrosi, J.I.W. Watterson and B.R.K. Kala 286
The excitation of isomeric states by accelerator neutrons from the $^{7}Li(p, n)^{7}Be$ reaction and their application in selective activation analysis
T.K. Magagula and J.I.W. Watterson 293
Accelerator-based approach experiments for remote identification of fissionable and other materials
I.V. Chuvilo, M.M. Danilov, Y.D. Katarzhnov, V.V. Kushin, V.G. Nedopekin, S.V. Plotnikov and V.I. Rogov 298
^{26}Al measurements with VERA
A. Wallner, R. Golser, W. Kutschera, A. Priller, P. Steier, H. Vonach and E. Wild 301

III. Applications of ion beams and materials modification

Preparation of ion-implanted and sub-monolayer ^{111}In-tracer layers for perturbed angular correlation analysis
M. Uhrmacher, M. Neubauer, W. Bolse, L. Ziegeler and K.P. Lieb 306
Solubility and damage annealing of Er implanted single crystalline α-Al_2O_3
E. Alves, R.C. da Silva, M.F. da Silva and J.C. Soares 313
Maskless patterning of $KTiOPO_4$ crystals by focused ion beam
T. Bachmann, R. Menzel, W. Wesch and C. Schmidt 318
Aluminum diffusion in Al-implanted AISI 321 stainless steel using accelerator-based characterization techniques
F. Noli, P. Misaelides and K. Bethge 322
In situ stress analysis of boron nitride films prepared by ion beam assisted deposition
M. Zeitler, S. Sienz, H. Neumann, M. Zeuner, J.W. Gerlach and B. Rauschenbach 327
Ion-beam induced magnetic anisotropies in iron films
M. Neubauer, N. Reinecke, M. Uhrmacher, K.P. Lieb, M. Münzenberg and W. Felsch 332
Study of the carbon concentration distribution in iron and titanium after low-temperature carbon ion implantation
A. Königer, A. Wenzel, M. Zeitler, J. Gerlach, C. Hammerl, W. Assmann, H. Huber, B. Stritzker and B. Rauschenbach 338
Analysis of the elements sputtered during the lanthanum implantation in stainless steels
F.J. Ager, M.A. Respaldiza, A. Paúl, J.A. Odriozola, J.M. Lobato, M.F. da Silva, L.M. Redondo and J.C. Soares 344
High flux $^{56}Fe^{+}$ and $^{57}Fe^{+}$ implantations for GMR applications
L.M. Redondo, C.M. de Jesus, J.G. Marques, M.F. da Silva, J.C. Soares, M.M. Pereira de Azevedo, J.A. Mendes, M.S. Rogalski and J.B. Sousa 350
On carbon nitride synthesis at high-dose ion implantation
E.A. Romanovsky, O.V. Bespalova, A.M. Borisov, N.G. Goryaga, V.S. Kulikauskas, V.G. Sukharev and V.V. Zatekin 355
Preparation of stopping masks for the P-LIGA technique with focused ion beams
R. Menzel, T. Bachmann, W. Wesch and C. Schmidt 359
P-LIGA: 3D-integration of microstructures with curved surfaces by deep ion irradiation
F. Schrempel and W. Witthuhn 363

Inactivation measurements of yeast along the path of 135 MeV/amu carbon for a beam monitor in medical applications
S. Matsumoto, B. Goto, M. Furuse, T. Kanai and F. Soga 372
Influence of the condensed phase state on the energy loss determination in Na-faujasite
H. Salah and B. Touchrift 377
The influence of physical state and chemical binding on the energy loss of Makrofol KG polycarbonate for helium ions
H. Salah, B. Touchrift and M. Saad 382

IV. Accelerator technology and ion sources

Beam instrumentation in a multidisciplinary accelerator facility
J.M. Schippers, S.N. Boon, O.C. Dermois and H.H. Kiewiet 389
Development of RF linac for high-current applications
K.C.D. Chan, G.P. Lawrence and J.D. Schneider 394
RF characteristics of IHQ linac for heavy ion implantation
T. Ito, E. Osvath, K. Sasa, N. Hayashizaki, K. Isokawa, H. Schubert and T. Hattori 401
Equipment and method for ion beam control in implantation and science experiments
K.O. Khokhlov, Y.G. Lazarev and G.D. Vedmanov 405
High duty factor nitrogen RFQ as a prototype high current implanter
A. Schempp, A. Bechtold, H. Vormann, O. Engels and A. Firjahn-Andersch 411
Pulsed ion beam formation of highly doped GaAs layers
R.M. Bayazitov, L.Kh. Antonova, I.B. Khaibullin and G.E. Remnev 418
An emittance scanning device for liquid metal ion sources
D. Löffelmacher, J. Adamczewski, A. Stephan, J. Meijer, H. Röcken, H.H. Bukow and C. Rolfs 422
The Stockholm ECR ion source injector project
U. Rosengård, G. Rouleau and K.-G. Rensfelt 428
Assembly and rf-properties of the VE-RFQ-project for the ISL-cyclotron at HMI
O. Engels, J. Häuser, H. Homeyer, W. Pelzer and A. Schempp 431
The RFQ-accelerator for the Heidelberg high current injector
M. Madert, R. Cee, M. Grieser, R. von Hahn, S. Papureanu, H. Podlech, R. Repnow, D. Schwalm and C.-M. Kleffner 437
Ring design of the Prague synchrotron for cancer therapy
A. Molodozhentsev, V. Makoveev, V. Minashkin, V. Shevtsov, G. Sidorov, K. Prokesh, J. Sedlak and M. Kuzmiak 441
The 7-gap-resonator–accelerator for the REX-ISOLDE-experiment at CERN
H. Podlech, M. Grieser, R. von Hahn, S. Papureanu, R. Repnow and D. Schwalm 447
Lifetime of charge stripping foils and transmission of heavy ions in 12UD-pelletron tandem accelerator
K. Shima, S. Ishii, T. Takahashi, I. Sugai, M. Oyaizu and T. Ishihara 451
Pulsed metallic ion beams as an efficient surface processing of industrial tools and components
W.L. Lin, J.M. Sang, X.J. Ding, X.M. Yuan, Y. Su, J. Xu and Y.Q. Ke 456
Project of positron source at the U-120 cyclotron Bucharest
P.M. Racolta, L. Popa-Simil, N. Miron and C.I. Muntele 461
Optimisation of light output from zinc sulphide scintillators for fast neutron radiography
H. Rahmanian and J.I.W. Watterson 466
Characterisation of neutron and gamma-ray emission from thick target Be(p,n) reaction for boron neutron capture therapy
J. Guzek, W.R. McMurray, T. Mateva, C.B. Franklyn and U.A.S. Tapper 471
Particle optics and accelerator modeling software for industrial and laboratory beamline design
G.H. Gillespie and B.W. Hill 476
The general particle tracer code applied to the fusion free-electron maser
M.J. de Loos, S.B. van der Geer, C.A.J. van der Geer, A.G.A. Verhoeven and W.H. Urbanus 481

Charged particle dynamics in axisymmetric nonconservative beams
V.I. Radchenko and O.I. Nikonov 487

V. Technology and applications of electron accelerators

A linear accelerator as a tool for investigations into free radical polymerization kinetics and mechanisms by means of pulsed electron beam polymerization
J.I.M. Botman, A.T.A.M. Derksen, A.M. van Herk, M. Jung, F.-D. Kuchta, L.G. Manders, C.J. Timmermans and M.J.A. de Voigt 490
Electron beam facility in polymer research: radiation induced functionalization of polytetrafluoroethylene
H. Dorschner, U. Lappan and K. Lunkwitz 495
Electron irradiation for adjusting the reverse recovery time and forward voltage drop characteristics of fast diodes
E. Iliescu, A. Niculescu, V. Banu, A. Nichita and N. Sturzu 502
A laboratory test unit for exhausted gas cleaning by electron beam and combined electron beam–microwave irradiation
M. Radoiu, D. Martin, I.I. Georgescu, I. Calinescu, V. Bestea, I. Indreias and C. Matei 506
A compact race-track microtron as a free electron laser source
A.A. Alimov, O.V. Chubarov, E.A. Knapp, V.I. Shvedunov and W.P. Trower 511
A mobile racetrack microtron
E.A. Knapp, A.W. Saunders, V.I. Shvedunov, N.P. Sobenin and W.P. Trower 517
The Eindhoven linac–racetrack microtron combination
W.H.C. Theuws, J.I.M. Botman, H.L. Hagedoorn and C.J. Timmermans 522
Novel race track microtron end magnets
G.A. Novikov, O.V. Chubarov, K. Halbach, A.I. Karev, V.I. Shvedunov and W.P. Trower 527
An ultra-compact hard X-ray superconducting light source for biotechnology and industrial use
D.B. Cline, A. Garren, M. Green, J. Kolonko and K. Lee 531
Advantages of single crystals as electron–photon converters for various applications
B.I. Shramenko 537
Aspects of accelerator-based photoemission
J.W.J. Verschuur, B.M. van Oerle, G.J. Ernst, D. Bisero and W.J. Witteman 541

Author index 547
